Norton AntiVirus 7.01 Installation

1. Install

   - Close all applications. Insert the Norton AntiVirus CD and run SETUP.BAT. WinInstall starts.
   - If there is a gold shield icon in your system tray (in the lower right corner of the screen), LanDesk Virus Protect is installed. It must be removed.
     o Select "Virus Protect 5.02" and 🖱 **Uninstall**.
     o Answer Yes to remove the Virus Protect client.
   - Select "Norton AntiVirus 7.01" and 🖱 **Install**.
     o The installation takes a long time. You may think it has crashed; it hasn't.
     o When the installation finishes, allow Windows to restart.

2. Scan for viruses

   - 🖱 (Right-click on) the gold shield icon in the system tray and choose "Open Norton AntiVirus".
   - **Scan|Scan Computer**
   - ☑ the boxes for all hard drives in your computer (skip CD-ROM and floppy drives).
   - 🖱 **Scan**.
   - If the scan detects any viruses, contact the Help Desk (617.886.****).
